WORK EXPERIENCE

Web Developer

Technical core engineers (Tecoreng)

03/2022 - Present

Ahmedabad, Gujrat

Achievements/Tasks

- Building and maintaining frontend components using ReactJs and JavaScript. Collaborated with senior developers to implement user interface enhancements and optimize application performance.
- Applied responsive design principals, ensuring seamless and visually appealing experiences across various devices and screen size.
- Committed to writing optimized code that ensures a high performing user experience. From lazy loading components to optimizing API requests, focus on delivering snappy and responsive applications.
- Collaborating closely with backend developers to ensure a smooth integration between the frontend and backend systems. This streamlines data flows, allowing for efficient API consumption and real-time updates.

PROJECTS

Company Website Development

- **Technology used: React JS and Next JS with Styled Components and Bootstrap.**
- Developed a user-friendly and visually appealing website for Tecoreng using ReactJS, Bootstrap, and Styled Components.
- Leveraged ReactJS to create a dynamic and responsive interface, enhancing user engagement and interactivity.
- Employed Bootstrap for streamlined and mobile-first design principles, ensuring compatibility across various devices and browsers. Integrated Styled Components to efficiently manage styles and maintain code scalability.

Stock Market Strategies (Web and Mobile App)

- **Technology used: React JS and Ionic**
- Development of a comprehensive stock market adviser application, encompassing both web and mobile platforms, to provide users with seamless access to trading strategies, live market data, and real-time notifications
- Utilized ReactJS for the web version and Ionic framework for the mobile version, ensuring cross-platform compatibility and consistent user experience across devices.

Event Management CRM

- **Technology used: React JS, Bootstrap**
- Led the development of a comprehensive CRM (Customer Relationship Management) system tailored for event management, catering to both administrative and publisher functionalities.
- The platform facilitates efficient event organization, promotion, and attendee management, offering seamless interaction between administrators and event publishers.
